

Grout bag

- Jointing bag is invaluable assistant for jointing of stone veneers, brick bands, pavements, blocks and filling of all joints.
- Use instructions:
 1. Before filling cut the jointing bag mouth acc. to the joint width.
 2. Fill the bag with compound to two thirds.
 3. ATTENTION! The compound shall not contain any lumps.
 4. Close the bag by turning and gradually press the compound out to the joint by the same manner.
 5. The compound must feature rather thin form and must enable easy pressing out without excessive force, otherwise the bag could broke.
 6. On completion of the job wash the bag under running water.
 7. If the bag mouth is clogged with a lump, do not use any force, but empty all contents, remove the obstacle and refill the bag.
- Recommended accessory: WILD STONE SH jointing compound
